

NISHA SINGH

Associate Manager · Full Stack Developer

Ballia, UP 277304 · +91 8115352152 · nishantmar1998@gmail.com · LinkedIn

PROFESSIONAL SUMMARY

Full Stack Developer with 6+ years of experience in backend and frontend development, building scalable and high-performance web applications. Expertise in Node.js, React.js, Next.js, TypeScript, and cloud platforms (Azure, AWS). Strong experience in RESTful API development, microservices architecture, CI/CD pipelines, and database optimization. Proven track record of improving system performance by 70% and delivering enterprise-grade solutions..

CORE COMPETENCIES

- ✓ Full Stack Development
- ✓ Backend Development (Node.js, PYTHON)
- ✓ Frontend Development (React.js, Next.js)
- ✓ RESTful API Development
- ✓ Microservices Architecture
- ✓ Cloud Computing (Azure, AWS)
- ✓ CI/CD Pipeline & DevOps
- ✓ Database Design & Optimization
- ✓ System Design & Scalability

TECHNICAL SKILLS

Programming Languages	JavaScript (ES6+), TypeScript, Python, PHP
Frontend Technologies	React JS, Next JS, HTML5, CSS3
Backend Technologies	Node JS, Express JS
Databases	PostgreSQL, MySQL, Prisma ORM
Cloud Platforms	Microsoft Azure (Functions, Databricks, Blob Storage, Key Vault, Logic Apps, Service Bus, Synapse Analytics), AWS (EC2, Elastic IP)
DevOps & Tools	Git, CI/CD Pipelines, Node Cron
AWS	EC2, Elastic IPs, High-Availability Infrastructure
Integrations & APIs	Salesforce API, SAP, Microsoft Dynamics 365 (OData API & Business Events), Skill Prism, SurveyMonkey API
Architecture	Microservices, REST APIs, OAuth 2.0, Object-Oriented Programming, Caching Strategies

PROFESSIONAL EXPERIENCE

Tredence Inc. | Bangalore / Gurugram

July 2022 – Present

Associate Manager – Full Stack Development

- Led a cross-functional team of 6 engineers to deliver scalable enterprise applications
- Built a Next.js-based internal platform, reducing the financial planning cycle from 2 months to 10 days
- Improved system performance by 70% by optimizing PostgreSQL queries and implementing caching strategies, reducing API response time to under 1 second
- Architected TRIBE, a microservices-based resource management platform integrated with Salesforce, Microsoft Dynamics 365, SAP, and Skill Prism
- Enabled competency-based resource allocation by integrating Skill Prism for real-time employee skill visibility
- Delivered a Timesheet Management System (TMS) with seamless Microsoft Dynamics 365 synchronization, role-based approval workflows, and payroll reporting, reducing manual effort by 40%
- Resolved high-severity production incidents, ensuring system reliability and SLA compliance
- Established engineering best practices through code reviews, documentation, and mentoring junior developers.

Senior Software Engineer

- Orchestrated end-to-end CI/CD pipelines, reducing deployment time by 40% and improving release efficiency
- Built and optimized RESTful APIs, enabling scalable communication between frontend and backend systems
- Optimized database queries and schema design across MySQL and PostgreSQL, improving system throughput
- Architected and built a full-stack Learning Management System (LMS) with real-time features
- Managed AWS infrastructure, ensuring high availability and system reliability
- Resolved production issues to improve system uptime and user experience.

KEY PROJECTS

TRIBE – Enterprise Resource Management Platform

Internal platform for demand tracking, resource allocation, bench management, and integrated talent visibility.

- Architected a microservices-based platform for real-time demand tracking and resource allocation
- Implemented two-way integration with Microsoft Dynamics 365 using OData APIs and Business Events
- Integrated Skill Prism to enable skill-based resource matching and reduce staffing mismatches
- Connected Salesforce and SAP systems to unify CRM, ERP, and HR data

Tech Stack: Microservices, React.js, Node.js, TypeScript, PostgreSQL, Azure (Logic Apps, Databricks, Key Vault, Service Bus), Salesforce API, SAP, MSD D365 (OData & Business Events), Skill Prism

TMS – Timesheet Management System

Secure weekly time-tracking solution with streamlined approval workflows, payroll reporting, and MSD data synchronization.

- Built a secure time-tracking platform with workflow-driven approvals and payroll reporting
- Enabled real-time data synchronization with Microsoft Dynamics 365
- Developed scheduled background jobs using Node Cron and Azure services to ensure consistent data flow
- Secured sensitive payroll data using Azure Key Vault

Tech Stack: Next.js, Node.js, TypeScript, PostgreSQL, Azure (Logic Apps, Key Vault, Databricks), Node Cron, Salesforce API

ATOM – Internal Service Provisioning Platform

DevOps platform for provisioning templated cloud services and managing project infrastructure.

- Created reusable templates and streamlined infrastructure provisioning workflows
- Built role-based dashboards for project and infrastructure management
- Reduced project setup time from days to hours.

Tech Stack: React.js, Node.js, TypeScript, PostgreSQL, Azure

EDUCATION

B. Tech – Computer Science Engineering

2018 – 2021

Dr. A.P.J. Abdul Kalam Technical University (AKTU)

Diploma – Information Technology

2014 – 2017

Board of Technical Education Uttar Pradesh (BTEUP)

CERTIFICATIONS

- AZ-900: Microsoft Azure Fundamentals – Microsoft / Udemy

ACHIEVEMENTS & RECOGNITION

- Outstanding Performer Award — Tredence **Inc** (2022)
- Workflow Optimization Recognition — Tredence **Inc** (2024)
